

Add On's

In this Section you will find enhancements for phpWCMS that do not need any source code changes.

Notice

For using add on's please edit following settings in your **conf.inc.php**:

In row 71 + 72 change both values to **1**.

```
$phpwcms["allow_ext_init"] = 1;  
$phpwcms["allow_ext_render"] = 1;
```

Have you already develop an Add-On? If you want, send it to us with a short description. So we can publish it here. But please send only those that don't need any source code changes for this section.
