

# User administration

## creation and management

### User Administration

#### creation and management

In the user administration area you can create and manage the user accounts. Here you can grant a user simple user rights or administration rights.

If you visit the user administration area for the first time the only user listed is the webmaster.

Here is an overview with descriptions for all icons in the user administration area:

#### Legend

<u>Icon</u>	<u>Description</u>
	Users with administration rights
	Users with basic user rights ( <b>no access to the ADMIN area</b> )
	User status
	User can log into the backend
	User is barred from logging into the backend
	You can change the users status by clicking the icon.
	Edit user details – change username, password or email address.
	Delete user account
