

Content Part "Link List"

link list: Enter each link using the following format:

designation|address

Enter each link on a new line. If you enter an e-mail address link, precede the e-mail address with "mailto:", for example, "mailto:info@mydomain.com".

A sample link list might look like this:

contact me|mailto:Info@mydomain.com
my homepage|http://www.mydomain.com

Using this sample list, a visitor to the site would see the following:

contact me
my homepage

To open Links in an external browser window the code would look like this

my homepage|http://www.mydomain.com _blank

[^ TOP](#)
