Field descriptions

image:	Here you can choose an image for your bid.
start date:& end date:	You define here the start date and end date of your bid. The format of both fields looks like this: (year-month-day hour:minute:seconds) 2004-12-24 00:00:00
start bid:&increase by:	Here you can decide how high the start bid is and in which steps it shall be increased after the bidding.Example: 10€ start bid 1€ increase = minimum bid 11€
before:	Here you still can write an initial text.

bid text:	Here you can compose your bid text. In this text you can use the following placeholders:**###BID_IMG:ALIGN###** Assign the alignment of the bid image. ALIGN will then be replaced with left | center | right**###BID_START:FORMAT###** Assign here the date's format of the start date. Replace FORMAT with *d/m/y* or *y/d/m* (y=year, m=month, d=day)**###BID_END:FORMAT###** Here you assign the date's format of the end date. Replace FORMAT with *d/m/y* or *y/d/m*, (y=year, m=month, d=day)**###START_BID###** With this placeholder you show the start bid. **###BID_CURRENT###** With this placeholder you show the actual bid. **###BID_FORM###** With this tag you show the bid form containing an email field and the bid field.
form tmpl:	Here you define the attributes of the form. Because the fields **###BID_EMAIL###** and **###BID_AMOUNT###** are two input fields, the placeholders will be inserted in an input tag. **###BID_EMAIL###** This placeholder is for showing the email field.Example: E-*mail:* **###BID_AMOUNT###** With this placeholder you can show the field for inserting the bid and also the minimum bid.Example: Your bid*:* Between these two placeholders you can insert the error message when a field does not contain the right value. Example: *Error: Please verify your input* At the end the HTML send button will be inserted.Example:
sent tmpl:	Insert here the verify message that shows the website visitor that his/her bid has seen successfully sent.Example: Ýour bid has been successfully sent. You will get a verify email*.*
from email:	Here you can define the sender's email address.
from name:	Here you can define the sender's name.
verify email:	Here you can create the email template that the visitor will receive after he/she has placed a bid.**###START_BID###** Specifies the start bid.**###VERIFY_LINK###** Creates the link for verifying the bid.**###DELETE_LINK###** Creates the link for deleting the bid. **###EMAIL###** Shows the email address of the bidder.**###BID###** Shows the bid amount.**###BID_START:FORMAT###** Herewith you can define the date's format of the start date. Replace FORMAT with *d/m/y* or *y/d/m* (y=year, m=month, d=day) **###BID_END:FORMAT###** Herewith you can define the date's format of the end date. Replace FORMAT with *d/m/y* or *y/d/m*, (y=year, m=month, d=day)**###BID_URL###** Insert the link to the bid.
verify text:	Insert here the verify message that shows the website visitor that his/her bid has been verified.Example: *Your bid has been successfully verified.*
bid deleted:	Insert here the verify message that shows the website visitor that his/her bid has been successfully deleted.Example: *Your bid has been deleted.*
after:	Here you still can compose a text part that will be showed after the intrinsic value.
