Upgrade an existing phpWCMS installation

Because there were so many changes changes with phpwcms, here are now the upgrade / update descriptions.

 The effort differs. The older the installed version is, the more effort is necessary for the upgrade to the actual version. But if you stay with the order of the upgrade description, you shouldn't have big problems.

 In "Update from RC 1.1 till 1.2.9 to 1.3.x" a universal upgrade description has been written that should make it possible to succeed with an upgrade to the actual phpwcms version 1.3.3.

 An upgrade description für the versions beginning from 1.2.9 will follow shortly.
