Language Settings for Replacement Tags

Some replacement tags are adjustable to your required language.

The following languages are available:

Country Initials	Country
AR	Arabia (since version 1.2.9)
BG	Bulgaria
CA	Catalan
CZ	Czech (since 6.8.2005)
DA	Denmark
DE	German
EN	English
ES	Spain
ET	Estonia
FI	Finnland
FR	France
GR	Greece (since 1.8.2005)
HU	Hungary
IT	Italy
LT	Lithuania
NL	Netherlands
NO	Norway
PL	Poland (since 9.10.2005)
PT	Portugal
RO	Romania (since version 1.2.6)
RU	Russia
SE	Sweden
SK	Slovakia
TR	Turkey (since version 1.2.9)
VN	Vietnam

By replacing the country initials you can change your language settings.

Countrycode List updated : Tuesday, 4. January 2011

Setting for Date and Time Tags

To change the date format according to your required language go to (config/phpwcms/)
conf.template_default.inc.php starting from line 158.
Replace "DE" with your desired country initials.

Additionally you have the choice between the following date and time formats.

// date and time formatting
$template_default["date"]["language"] = "**DE**"; // DE=German, IT=Italian, FR=French
$template_default["date"]["long"] = "l, j. F Y"; // (Monday, 1. October 2003)
$template_default["date"]["medium"] = "D, j. M y"; // (Mon, 1. Oct 03)
$template_default["date"]["short"] = "Y/m/d"; // (2003/12/25)
$template_default["date"]["article"] = "Y/m/d"; // (2003/12/25)
$template_default["time"]["long"] = "H:i:s"; // 15:25:45
$template_default["time"]["short"] = "H:i"; // 15:25

Settings for the {
NEW:X} Tag

You can also change the date format in the {NEW:X} Tag.

To do this edit again the (config/phpwcms/} **conf.template_default.inc.php** . In line 189 there you will find
the following expression.

*$template_default["news"]["date_language"] = "**EN**";*

Replace "EN" with the country initial you need to use.
